Election/Restrictions

1. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1. In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-4, 9-15, drawn to a method of treating pain by administration of a peptide of SEQ ID NO: 2.

Group 2, claim(s) 5-7, drawn to a polypeptide of SEQ ID NO: 2.

Group 3, claim 8, drawn to a nucleic acid encoding the polypeptide of SEQ ID NO:2.

Group 4, claim(s) 16-17, drawn to a method of treating neuronal cell death by administration of a peptide of SEQ ID NO: 2.

2. This PCT rule defines special technical features as technical features that identify a contribution which each of the claimed inventions, considered as a whole, makes over prior art. The inventions listed as Groups I-4 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Schachner (2003) discloses a method of promoting outgrowth of mammalian neurons by administration of a fragment of L1-CAM of SEQ ID NO: 2. See claims 1-6. Therefore claims 1-4, and 9-15 lack a special technical feature in common with claims 5-8, and 16-17, and cannot share one with the other claims.
